Installation Notes:

- Rc 1/2" female inlets.
- Optimum working pressure 300-500 kPa.
- Maximum hydrostatic pressure 800kPa. (This pressure may be exceeded only under test conditions).
- Maximum temperature 80°C.
- Where normal working pressure exceeds the maximum, pressure limiting valves should be installed.
- For optimum installation it is important that the valve is installed plumb on both horizontal and vertical planes.
- Inline filters should be used to protect tapware from debris that may be present within the plumbing.
